For patient:

11. Keep your hair clean. Gently wash hair with mild shampoo and room temperature water, never with warm or hot water. During warm weather, wash your hair 4 to 7 times per week. During cool weather, wash hair at least 4 times per week to avoid build up of disease causing scalp oil and dead skin.
12. Eat nutritionally balanced healthy diet. Consult your physician for recommendations for vitamin and mineral supplements for your particular needs.
13. Practice the Meditation on Twin Hearts regularly to relieve stress and raise the energy level.
14. Regular physical exercise to build up the physical and energy bodies and relieve stress.
